**HAMBERGER®**  
SANITARY

Our heart beats for toilet seats - and has done so for over 100 years! We are pioneers and trendsetters in this field and have been taking the toilet seat to a new level with numerous innovations and patents for decades. Perhaps this is also a reason why we have been the market leader in Europe for a long time and even the world leader with our WC seats made of Duroplast. This makes us proud and drives us on. As an owner-managed company with a long tradition, we are strongly rooted in our Bavarian homeland, but we also successfully put out our feelers - into the world and into the future of the bathroom industry.

Our development department with its experienced engineers, creative designers and detail-oriented technicians is constantly surprising us and the industry with new designs and functions at the cutting edge of technology. Tradition and trend, close to home and global player - at Hamberger Sanitary these opposites complement each other perfectly.

A brand from Hamberger

**Toilet seat  
manufacturer**

# Our WC seats create quality of life

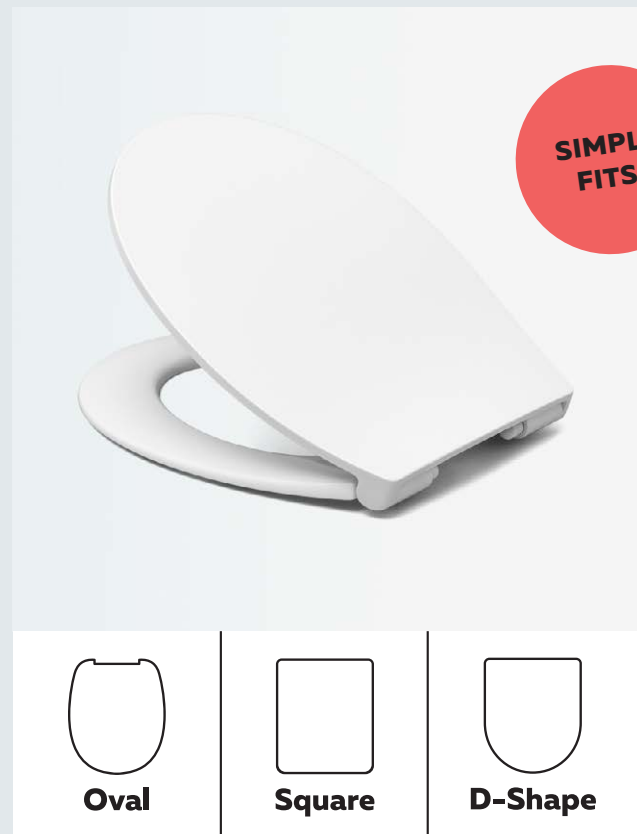

We achieve this with clever comfort functions and the highest quality materials that feel good, look great and make perfect hygiene child's play. The high quality is also reflected in the durability of our toilet seats. A product of value and durability - that's sustainability taken a step further.

## Fits almost all commercially available ceramics in Germany

Our Cedo toilet seats are available in the following three basic shapes:

- in classic oval shape
- in a fancy angular shape
- and in modern D-shape

**Only from the best material can high-quality WC seats are created!**

This allows the toilet lid to be perfectly matched to the shape of the WC ceramics and the design of the bathroom at home.

Of course, our seats are compatible with the toilets of all well-known WC manufacturers.

## Quality without compromise

When it comes to the quality of our WC seats, we make no compromises. Through strict control and careful testing, we ensure the constant quality of the materials used, the processes and the finished products.

We guarantee stable quality in all stages of our production processes. Our toilet seats more than meet the high DIN quality standard and exceed consumer demands. This is not just a promise to our partners. Numerous certifications and awards officially confirm this: all models of our toilet seats are certified according to the DIN standard. DIN 19516 tested.
